Some tips for dealing with possible bugs/ implementation of special requirements of editing work in LaTeX

1. Eliminating the red markings, like this:

   Solution:

   https://tex.stackexchange.com/questions/823/remove-ugly-borders-around-clickable-cross-references-and-hyperlinks

   There is an explanation about how to handle this issue, using the following:

   \usepackage[hidelinks]{hyperref}

2. Make sure that your table of content has the line that refers to Bibliography chapter and that the page number for it is correct. There is a bug in LaTex that makes it not to appear or to appear with a wrong page number.
   Possible solution:

   \usepackage[nottoc,notlot,notlof]{tocbibind}

   And/or

   \cleardoublepage

   \addcontentsline{toc}{chapter}{Bibliography}

3. Hebrew abstract page has to be numbered with Hebrew letters (א"ב). In the Toc you need to mention its existence as the last row. The following may help:

```
\renewcommand{\thepage}{$\aleph$}
```

or

```
\renewcommand{\thepage}{א}
```

4. In the Appendix section, for instance, for Appendix title to appear as whole and not only as A/B, so instead of:

A Supple
   Efficie

B Supple
   Box O

There will be:

Appendix A Sup
   ment for Effici

Appendix B Sup

You need to do the following changes:

1. Delete the line: \appendix

   Before the Appendix chapter

2. Add at the beginning of the document the following package:

   \usepackage[titletoc]{appendix}

3. Add the Appendix chapters in the following way:

   \begin{appendices}
   \chapter{An appendix} \chapter{An appendix}
   \end{appendices}
